DECEMBER 1 INVENTORY

U. S. inventory of hogs and pigs is estimated at 55.1 million head on December 1, 1976. This is 11 percent more than a year earlier but only slightly above December 1, 1974, according to the Crop Reporting Board.

- Number kept for breeding, at 8.0 million, is 5 percent more than a year ago and 8 percent more than two years ago.
- Number for market, at 47.1 million is up 12 percent from December 1, 1975 but 1 percent less than December 1, 1974.

The 14 Quarterly States had 47.0 million head on December 1, up 12 percent from last year but just slightly less than December 1, 1974. These 14 States accounted for 85 percent of the total U. S. hog and pig inventory.

1976 PIG CROP

The U. S. pig crop from December 1975 - November 1976 was 84.6 million head, 19 percent more than last year and 1 percent more than two years ago.

- December 1975 - May 1976 pig crop, now estimated at the revised level of 42.2 million, was up 19 percent from a year earlier but 6 percent less than December - May two years ago.
- June - November 1976 pig crop, estimated at 42.4 million, was up 18 percent from last year and 9 percent more than two years ago.

The previous six month pig crop (June-November) is 76.9 percent of the December 1, 1976 inventory of all hogs and pigs compared with 72.2 percent a year ago. This means hogs gained faster and were marketed sooner on the average in 1976 than a year ago.

The 5.9 million sows that farrowed during June-November 1976 was 18 percent more than a year earlier. Average litter size during this period was 7.22 compared with 7.21 a year earlier.

Pig crop in the 14 Quarterly States for June-August 1976 was 18.4 million, up 23 percent from a year earlier. For September-November 1976, the crop was 17.9 million, up 18 percent from the comparable quarter a year earlier.

FARROWING INTENTIONS

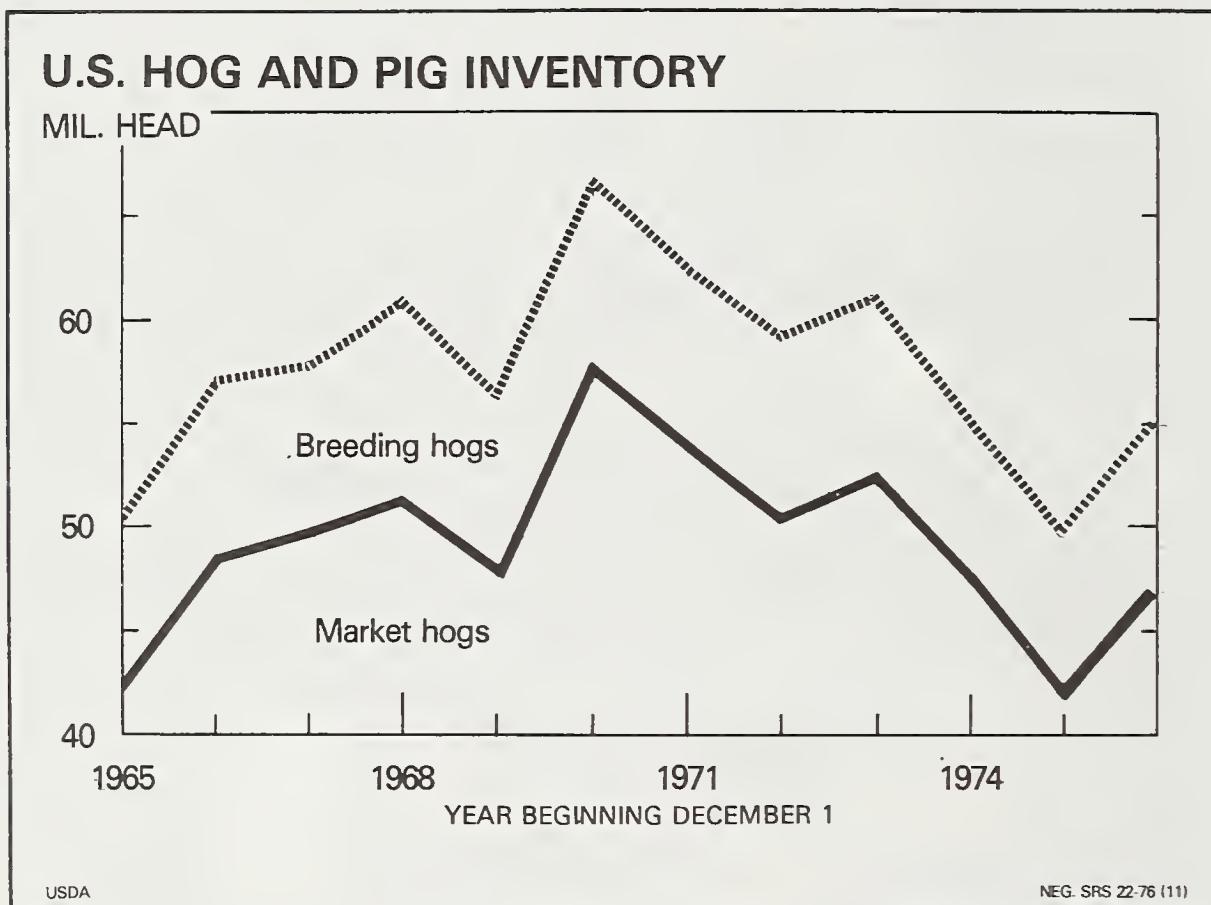

Hog producers in the U.S. intend to farrow 6.1 million sows during December 1976 - May 1977, an increase of 5 percent from the same period last year and 23 percent more than two years ago.

These intentions and a projected litter size indicate a pig crop of 44.3 million, 5 percent above a year earlier and 25 percent more than December 1974 - May 1975.

Intentions in the 14 Quarterly States are for 2.2 million sows to farrow during the 3 month period from December 1976 - February 1977, up 10 percent from the same quarter last year. March-May 1977 intentions in these States, at 3.0 million, are 4 percent above the March-May 1976 quarter.

RELIABILITY OF ESTIMATES

The hog estimates are based on probability surveys and are subject to sampling variability because not all operations with hogs are included in the survey sample. The sampling variability for the December 1, 1976 inventory estimate of 55.1 million head, as measured by the relative standard error, is approximately three percent at the National level. This means chances are roughly two out of three that the complete coverage value would lie between 53.45 and 56.75 million head.
